A game with incredible new ideas and a varied gameplay. Hunt for Dr. Murlock and fight a war against his hardware-sprites in the CPC Plus models. Save all computers on earth from being destroyed by him, because 'older' CPCs are victims too!! Be aware of the cannons that hurl a lot of snow, the snowstorm, the countless big balls and of course the time limit; this makes the game very interesting and tense. Over 450kb of packed files on the disk with more than 80 levels must be solved by Ramses and Columbus to finally defeat Dr. Murlock. A lot of CRTC - tricks, modern screen splitting techniques, parallax scrolling, vector graphics and much more will amaze you in this game, which can't be compared with other games.

This game works on all kinds of CPC; but it doesn't work on the new Plus machines. You need minimum 128kb RAM (compatible with dk'tronics and Dobbertin expansions).
